Protecting What Matters

Many contractors & companies mistakenly believe that they only need to worry about risk management after an incident, but the truth is you can start saving now by implementing safety and risk evaluation programs & policies. Even the most forward-thinking companies experience losses, so it's important to be ready with job-specific risk management programs and response plans. The team at Associates Insurance Agency can help you prepare your workplace so you're ready to respond to a variety of scenarios.

Our Services

Compliance Tools & Assistance

OSHA, DOT, & Insurance carriers often release rules, regulations, & guidelines specific to contractors and the construction industry. Not meeting or maintaining these compliance requirements can lead to costly fines, premium increases and a tarnished reputation. We have the necessary knowledge and resources to help your business comply with these proper standards.

Our Services Cont.

Policy & Program Creation

Associates can provide you with company safety manuals such as employee handbooks, driver & fleet safety policies, HAZCOM & much more.

Injury & Illness Investigation

Make sure that injuries only cost you once. If your company has a claim, Associates can investigate the source and provide guidance to help prevent it from happening again.

Jobsite Assessments

A fresh set of eyes never hurts. Associates can help you conduct jobsite hazard assessments to better protect your employees & reduce incident frequency.

Employee Training

Associates offers many trainings to educate your employees on common workplace issues.

These include:

- NSC Certified Defensive & Distracted Driver Training Course
- Coordinate/Facilitate OSHA 10 & 30 hour
- Jobsite Hazard Assessment & Site Inspections
- Fall Protection Training & Prevention
- Straight Mast Forklift Operator Training
- Safety Meetings, Toolbox Talks & Much More

Additional Resources

These are other programs and resources the agency has invested heavily in, to be able to offer at no cost to any of our clients:

- **Mineral** (formerly THINK H.R.) – an interactive Human Resources & compliance platform with state and federal guidance.
- **Automate Safety** – a modernized application that allows you to plan, distribute, and document safety meetings and toolbox talks to employee's cell phones via a text message.
- **OSHA Logs app** – a program designed to simplify and streamline the OSHA compliance, reporting, and recording process electronically.
